

## AQUA METROLOGY

Aqua Metrology Systems, Ltd. (AMS) believes real-time water quality analysis is essential to environmental protection. Our intelligent water quality instruments provide high-frequency, accurate and reliable data on disinfection byproducts (THMs - Total THM, THM Formation Potential, THM speciation) and trace metals (Arsenic, Chromium and Hexavalent Chromium, Selenium, Lead, Copper and more) through continuous online monitoring.

From project planning through to full-scale operations — real-time water quality data drives smart decisions.
