

**TB ALLIANCE**

We envision a world where no one dies of tuberculosis. However, this cannot be achieved without improved, faster acting, and affordable tuberculosis drug regimens that are available to all who need them. These new cures can bring renewed health, hope, and prosperity to millions. Since our inception in 2000, TB Alliance has led the global search for and development of new TB regimens, catalyzing the field and convening cross-sector partnerships to forge the progress that is urgently needed for better TB treatments.
