LayerZero Labs

LayerZero is an interoperability protocol that connects blockchains (50+ and counting), allowing developers to build seamless omnichain applications, tokens, and experiences. The protocol relies on immutable on-chain endpoints, a configurable Security Stack, and a permissionless set of Executors to transfer censorship-resistant messages between chains.

Demographics

INDUSTRY Fin-tech

HEADQUARTERS Tortola, BVI

FOUNDED 2021

EMPLOYEES 88

EXISTING ERP QuickBooks
