Honest to a Fault.

The consulting industry is plagued with firms willing to take advantage of a customer's inexperience around budget, deployment timeline, and software knowledge. At Caravel, we are upfront and honest about everything. The reality is that implementing ERP software (if done right) is difficult. It takes time and money. Caravel would rather forfeit jobs to other firms promising cheaper pricing and unrealistic timelines than cut corners and costs at the detriment of the customer. Our goal is to meet customer expectations on Day 1 by finding the best fit for an implementation and helping to set customers up for success from the start.

Technology projects are transformative and imperfect by their very nature, involve business disruption and time from companies most valuable resources. There will be unforeseen challenges that present themselves. Caravel's commitment is that we will be there every step of the way as we view this as a partnership – your business goals and objectives are ours as well. We are not a perfect or error free organization but try to continually improve and refine our approach in an ongoing effort to deliver excellent services.

About Caravel

Caravel has served more than 500 clients over the past decade, providing a comprehensive range of services, including accounting, strategy, business processes and technology selection. Our commitment to excellence drives us to continually improve and refine our approach, helping our clients solve complex problems with modern tools.

Caravel is proud to be a part of the technology services group of BPM LLP, a top 40 accounting and advisory firm. With our team by your side, you can unlock your business's true potential and drive success in an ever-evolving marketplace.
