

Construction

Organizations in the construction space have very specific requirements about how to manage, report, bill and budget against their projects. Some organizations leverage 3rd party tools, like Procore, to manage their construction work, but for those looking to manage projects directly within their NetSuite environment, Caravel's Construction SuiteBundle provides the needed functionality to do so.

To build an upgraded and enhanced SuiteBundle, Caravel has partnered with InteriorWorx, a construction company specializing in both residential and commercial projects.

Engineered specifically for the construction industry, our solution optimizes project management, resource allocation, and financial tracking within the familiar NetSuite interface. With robust features like project costing, progress tracking, and subcontractor management, you'll streamline operations and drive profitability like never before. Harness the power of real-time data synchronization, automated workflows, and advanced analytics to make informed decisions and stay ahead of the competition. Whether you're a general contractor, subcontractor, or developer, our NetSuite-integrated construction solution is your key to unlocking efficiency, agility, and success in today's dynamic construction landscape.

The SuiteBundle is built directly within NetSuite and extends the native NetSuite SuiteProjects functionality for the below:

**Cost Code
Management**

**Schedule
of Values**

**AIA and
Retention Billing**

**Change Order
Management**

**Revenue
Recognition**

**Budgeting and
Budget Comparisons**

WIP Reporting

Why Companies Choose Caravel

The automation of data migration has played a pivotal role in the success of Caravel's NetSuite implementations by streamlining and enhancing the transfer of data from legacy systems to the NetSuite. The Data Migration Platform has not only allowed for an efficient process but has minimized the risk of errors that can occur during a manual data migration process.
