

## Emerging NSAW Pre-Built Packages

NetSuite Analytics Warehouse (NSAW) is a powerful module within the NetSuite toolkit designed to enhance data analytics and reporting capabilities. It provides a centralized repository for data from various business processes, enabling organizations to gain deeper insights and make informed decisions.

To aid in the rapid and efficient deployment of NSAW, Caravel has released their Pre-Built NSAW Packages, ranging from simple NSAW deployments to advanced deployments with multiple data source meshing capabilities.

These packages can be implemented in tandem with a Caravel-managed implementation or a NetSuite Professional Services-managed implementation.

PLEASE SEE BELOW FOR A DESCRIPTION AND PRICING RANGE FOR EACH CORE PACKAGE.
